Data Analytics- AI/ML Intern @AgNext | Winner @NPCI hackathon | PEC'27 | Transforming ideas into Impact  
Chandigarh, Chandigarh, India

## Summary

Third-year engineering student with a strong interest in data-driven problem solving and analytical thinking. Experienced in working with structured and unstructured data, building interactive dashboards, and applying machine learning techniques to real-world challenges

Over time, I've developed a growing interest in how data can be used to drive better decisions, whether through visualizations, models, or just asking the right questions.

I've had the chance to explore this through college projects, hackathons, and independent learning, and I've found that I really enjoy the full process - from digging into raw data to sharing insights in a clear, meaningful way.

Outside of the technical side, I love being part of teams where ideas flow, everyone brings something different to the table, and there's room to experiment and improve

I am actively looking for opportunities to apply my knowledge in dynamic environments where I can contribute to impactful work and grow both personally and professionally.
